

I see 'NO' logical reason to weaken Wisconsin's 'NO Call' Law just because it is stronger than the Federal Law. If we have improved on the design (your law) then why should we change. If we have improved on the Gas Engine to get better fuel efficiently would you have us go back to the old design and use more Fuel ? In recent years the Federal Government has taken the approach to interfere more in State issues. Personally, I feel this is a STATE issue and the Federal Government should bow out ! !
